

Global Sensors offers precision VFC-compliant data loggers, from basic USB models to advanced Wi-Fi loggers with 24/7 alerts. Many feature smart probe technology for easy recalibration. They also provide ARCTIKO refrigerators and freezers, ideal for medical settings, with options like glass or solid doors, secure locks, and rapid cooling. The Flexaline series stands out for performance, competitive pricing, and dedicated customer support.

Comprehensive Data Logging Solutions

Ensure the safety and compliance of your vaccine storage with our advanced data loggers:

VFC 311-USB

A hassle-free temperature data logger with smart probe technology. Easily swap in a new smart probe to maintain compliance without downtime. Configurable alarm levels, audible alerts, and USB data downloads provide peace of mind.

EL-USB-VAC

A standalone vaccine data logger capable of storing over 32,000 readings within a -40 to +125°C range. Features an LCD screen and push-button for quick access to recent, highest, and lowest recorded temperatures.

UTREL30-16 CP Kit with Smart Probe

Includes UTREL30-16 Data Logger, CP10S-15 External Probe, Buffer Bottle, Wall Mount Bracket, and NIST Calibration Certificate.

LogTag UTRED30-16 CP Kit with Dual Smart Probe

Includes TRED30-16 Data Logger, two CP110K-15 External Probes, two Buffer Bottles, Wall Mount Bracket, and NIST Calibration Certificate.

LogTag TRED30-16 CP Kit with Smart Probe

Includes TRED30-16 Data Logger, CP110K-15 External Probe, Buffer Bottle, Wall Mount Bracket, and NIST Calibration Certificate.

Vaccine Refrigerators & Freezers

Maintain vaccine efficacy with reliable cold storage solutions:

Small Benchtop Freezer – ULUF P90

Compact ULT model (88L) with a temperature range of -25°C to -86°C .

Small Undercounter Refrigerator – PRE 125-US

3.85 ft³ pharmaceutical fridge with a double-pane glass door, ensuring precise temperature control from $+2^{\circ}\text{C}$ to $+8^{\circ}\text{C}$.

**EARN A CPP
GRANT OF UP
TO \$750!**

Medium Upright Refrigerator – PRE 490-US

17.23 ft³ upright pharmaceutical fridge with double-pane glass door and temperature control from $+2^{\circ}\text{C}$ to $+8^{\circ}\text{C}$.

Large Upright Freezer – LFE 490-US

17.34 ft³ biomedical freezer with precise temperature control from -25°C to -10°C , offering flexibility, security, and reliability.

Small Undercounter Freezer – LFE 125-US

4.17 ft³ biomedical freezer with an upright design, maintaining temperatures from -10°C to -25°C .

Exclusive Benefits for CPP Members

CPP members gain access to valuable vaccine storage & handling resources and financial incentives:

Enjoy discounted pricing on vaccine refrigerators and freezers from Global Sensors.

Earn a CPP Educational Grant to support practice staff education and offset equipment costs. You may be eligible for up to \$750. [Contact the CPP office](#) or call 614-722-2145 for more information.

Secure Your Vaccine Storage Today!

Take advantage of discounted pricing and CPP grant opportunities to enhance your vaccine storage system. Visit global-sensors.com to view products and call or email Marty Eagan – (973-713-5567 meagan@global-sensors.com) to place an order with CPP's discount.
